# Isuzu Setting the Standard with New Model Training

Following the successful launch of its all-new MY25 model line-up at the Brisbane Truck Show, Isuzu Australia Limited (IAL) is undertaking its most comprehensive sales training regime on record.

Under the guidance of Isuzu Australia Limited's (IAL) National Sales Training Manager, Tim Richardson, Isuzu dealer representatives are being provided with a range of product training events, including dealership-based programs and practical driving events being held at venues across Australia.

The MY25 range is the first full-model changeover since 2008 and includes a raft of new elements from platform architecture through to advanced safety, as well as new driveline and powertrain technology.

## All & sundry

Training includes representation from all areas within a dealership, from new vehicle sales representatives, through to parts, service, support, plus a range of other customer-facing dealer staff from over 70 sites across the country.

"Everyone at Isuzu is very excited about the new range, but the trucks don't sell themselves," said Mr Richardson.

"The details of the changes are just the beginning, with a philosophy around new initiatives and benefits exceeding ADRs (Australian Design Rules) setting a new standard with these new trucks.

"The needs of customers are also evolving. Yes, they want to know if the truck can do the job, but there are also a range of questions around safety, the environment, parts, servicing, and total cost of ownership equations.

"The training ensures that everyone has sound product knowledge but also breaks into specialty areas within dealerships, because all these people are Isuzu Trucks advocates.

## More than just a product

Mr Richardson said that important elements such as seeing, touching and driving the new range were critical to its sales success and market acceptance.

Isuzu Australia is currently hosting practical driving and sales training under controlled conditions at venues including the former General Motors Proving Ground at Lang Lang, Southeast of Melbourne.

"Isuzu and its dealers are not just selling a product; we're providing a solution to many wide and varied industries," he said.

Patrick Ryan works directly with Isuzu's fleet customers

Getting Isuzu dealer staff and key customers behind the wheel is crucial

Face-to-face interaction is crucial to the training process

"The Isuzu dealer network comprises not only a wide range of metropolitan and regional dealers, but also services a diverse range of customers and applications. The training caters for customers in north Queensland and allows for the needs of what is required in Tasmania as well - it's all about flexibility and adaptability.

"This is not just one model in one market segment, it's an entire new line-up from light through to heavy-duty, including an all-new small city truck (the NKR).

"We want those who are selling the trucks to experience them firsthand and that is not just driving them but understanding the safety systems in action, in controlled conditions.

"It is this practical experience that can be shared with customers."

## Fleet of foot

A key addition made to the Isuzu Training department recently is that of Fleet Training Manager, Patrick Ryan, who is working directly with fleet customers on the new model range.

"Patrick's role is unique as it aims to ensure fleet managers from a wide range of sectors understand the MY25 Isuzu models and ensure their operators are making the most of the many features on these vehicles," Mr Richardson said.

"Patrick has many years of experience in the heavy vehicle sector and can work with operators large and small. Some of these operators might have 30-plus years behind the wheel through to drivers that have just joined the industry.

"Again, this is another example of Isuzu having all manner of customers absolutely front of mind."

## Every base covered

Beyond the practical, the Isuzu training process includes a range of initiatives, including on-line modules that cater for updates and refresher courses.

Isuzu has dedicated Zone Managers across the country and not simply a single representative to cater for all.

"Isuzu's approach, with dedicated field staff working directly with our dealerships, not only increases product knowledge but also industry knowledge. This is super important," said Mr Richardson.

"The Isuzu Australia team gains critical knowledge from travelling the breadth of the network and shares that to the benefit of all dealers and of course our customers too.

"What it ultimately means is that we're not complacent. We're striving to set a new standard and continually lift the bar; this underlines why Isuzu has been the market leader since 1989."

### Benefits of Isuzu Genuine Parts purchased through the authorised dealer network

Isuzu Genuine parts, are components made by Isuzu, for Isuzu Trucks. The key benefits include:

- Assured Quality and Performance
- Long-Term Value
- Peace of Mind
- Warranty Protection

### Warranty Details

The warranty for genuine parts can vary depending on how they are purchased and installed.

#### 12-Month Warranty Over-the-Counter

#### 36-Month Warranty When Installed in an Authorised Isuzu Dealer Workshop

### Dealership Network

The existence of a nationwide dealership network, with 74 locations, provides significant advantages to customers:

- Widespread Accessibility
- Expert Service
- Consistent Quality
- Ease of Warranty Claims

## PRODUCT RELEASE

# Isuzu ATF Syn HD with Allison Transmission TES 668® Approval

### Genuine Lubricants

Isuzu ATF Syn HD is a meticulously engineered synthetic fluid using premium-quality base oils combined with advanced additive technology, specifically tailored to address the stringent requirements of the Allison Transmission TES 668® specification. The formulation underwent comprehensive testing in accordance with the rigorous Allison evaluation programme, demonstrating superior thermal stability, oxidation resistance, and wear protection. As a result of meeting and exceeding these performance benchmarks, Isuzu ATF Syn HD has received formal approval for use under the Allison Transmission TES 668® standard (Approval Number: 668-10562025) and carries the certification mark, offering customers enhanced reliability and optimal transmission performance in demanding operating environments. Suitable for use in Allison 1000 Series™, 2000 Series™, 3000 Series™, 4000 Series™, and H 40/50 EP™ on-highway products

## ISUZU SERVICE AGREEMENTS

# Zero-stress servicing. Brought to you by Isuzu.

No business wants big, unexpected bills. But with an Isuzu service agreement, you can flatten your truck servicing costs into a predictable monthly payment (or upfront fee with Isuzu Essentials). You'll also be part of one of Australia's biggest dealer networks, so you can book a service at locations around the country. With the new Chain of Responsibility laws, proper servicing will protect your business. Lastly, service agreements come with Isuzu Care, Australia's most comprehensive truck customer care programme. To find out more, see your nearest dealer or visit [isuzu.com.au/care-support/service-agreements](http://isuzu.com.au/care-support/service-agreements).

Ask your local Isuzu dealer about which service agreement is right for you.

Isuzu Essentials

Isuzu Essentials Plus

Isuzu Total

Isuzu Heritage

### DEALER NETWORK

Isuzu has Australia's biggest dealer network. If you book into any Isuzu Service Centre nationwide, they'll have access to your truck's comprehensive service history

### ISUZU CARE

Australia's most comprehensive truck customer care programme, Isuzu Care has a team of service specialists to ensure that owning your Isuzu is a great experience. To contact them, just freecall 1800 035 640.

### STREAMLINED PROCESS

Maintaining your trucks under a Priority Service Agreement is quick and easy. With prearranged payments, you won't have to worry about the hassle of arranging finances before your drivers drop off and pick up trucks on the day of the service.

### CHAIN OF RESPONSIBILITY & NHVR

With a Priority Service Agreement, you're clearly demonstrating that you've pre-planned your fleet maintenance and have put established procedures in place. That means establishing NHVR (National Heavy Vehicle Regulator) fleet maintenance requirements couldn't be easier.

### ONLY THE BEST SERVICE AND PARTS

Using a combination of the latest diagnostic software and Isuzu-approved parts, our qualified Isuzu technicians will keep your truck in tip-top condition.

### REDUCE TOTAL COST OF OWNERSHIP

Better servicing helps reduce unforeseen overheads and results in more reliable, fuel-efficient trucks. And that means less downtime and lower total cost of ownership.

### FACTORY TRAINED TECHNICIANS

Why would you trust your Isuzu to anyone but an Isuzu-trained technician? With meticulous training tailored specifically to Isuzu trucks, our team carries out servicing and repairs to manufacturer-documented standards (and that means the highest level possible!).

### RESALE VALUE

Thanks to the comprehensive service history you receive from Isuzu, you'll always get the best price for your truck when the time comes for an upgrade.

## Introducing EX2R Featuring RGB Enabled Position Lights

Narva's new EX2 range offers unrivalled expression with over 20 models, interchangeable colour trims, customisable lens protectors and RGB enabled position lights (EX2R) so you can tailor them to your vehicle or your mood with your phone.

# NARVA®

## THE VISION TO GO FURTHER

### Clever Harness-Free DIY Installation

Revolutionary, patent-pending internal switching design of the EX2 range eliminates the need for a harness, making them the easiest to wire on the market, with no components needing to be routed through the firewall.

### World-Class Build Quality

Featuring a virtually unbreakable UV Resistant Hard Coated polycarbonate lens which won't chip or yellow with age, diecast aluminium housing, and the highest possible ingress protection (IP68 & IP69K), EX2 lights provide exceptional durability and reliability

### Exceptional Performance

EX2's hybrid beam provides outstanding width and distance, without dark spots or hot spots, ensuring exceptional clarity in the dark. 1 lux is available at 700m (Length) and 60m (Width) with a pair of 9" Driving Lights while the 30" double row light bar achieves an impressive 724m (Length) and 100m (Width).

### 8 Interchangeable Colour Trims

EX2 allows for a tool-free custom look to your driving lights and light bars with 8 interchangeable trim colour options: Slate (Grey), Stealth (Black), Sunburst (Yellow), Volcano (Red), Electric (Blue), Hyper (Green), Juiced (Orange), and Bubblegum (Pink).

### 7 Year No Fault Warranty

What's 'no fault'? Well if you feel that it should be covered by warranty, so do we! So, if you have a collision with a roo and your EX2 lamp is severely damaged, we'll happily replace it.

# Big River Turf & Isuzu Power Solutions

Aussie lawns have long been seen as a source of pride. For some they are nothing more than an engrossing hobby, for others, an obsession.

Big River Turf is a family-owned and operated grower of exceptional-quality instant turf.

Located on Victoria's rich volcanic plains around the regional hub of Bacchus Marsh, much of their business comes from supplying commercial and real estate ventures with the turf for ovals, reserves, nature strips and residential lawns.

Recently, Big River Turf teamed up with Water Dynamics in Yarrowonga to change the irrigation system their growing operation relies upon.

Big River wanted to optimise the growth they could get from their land and change their system from a fixed spray setup to a more efficient centre pivot irrigation model, something Water Dynamics specialise in throughout the state.

## The pivot point

Big River specified diesel power units to run the centre pivot system, instead of connecting the system to the grid, this due to increasing energy prices nationwide.

When it came time to find a power source, Water Dynamics turned to the team at Isuzu Power Solutions (IPS), who had a range of suitable power solutions under their Make-to-Stock and Assembled-to-Order product ranges.

"Working with the IPS team, we shared the power requirements and duty and selected the 3CE for the smaller machines and the 4LE for the larger machine. Both of these models are extremely reliable, quiet, efficient, and able to hold their own in any weather," said Paul Moat of Water Dynamics.

With a 2.2 litre displacement, the turbocharged 4LE, water-cooled four-cylinder diesel-powered unit is designed for low fuel consumption, low noise, and low maintenance. The package is designed by the Australian engineering team to effortlessly handle even the most brutal weather conditions, and the engine can continue its work regardless of the environment they find themselves in.

"The Isuzu products are really quiet and because the work the engine does is pretty constant, once the engine's bedded in, they become very fuel efficient. They'll just sit there operating away at the speeds required, not using much fuel at all."

## Keeping quiet

Big River Turf wanted to ensure their operation, which neighbours some busy residential areas, was as quiet as possible. The engines feature ultra-quiet technology, perfect for their requirements.

Ivi Cicak, Sales Manager at Big River Turf was a university researcher until he made the change to spending more time outdoors and getting into the family business.

"Coming into spring, where the weather gets better, there's a lot of parks and reserves that we supply to as councils look to rejuvenate common areas.

"In Summer, we get to do jobs where there's big open areas. It's a terrific being on those jobs."

## Hard work

"We go through more than a million metres of turf a year," said Ivi, explaining that an operation of that size had a lot of moving parts and a lot of customers to keep happy.

"We need all of our equipment working as hard as we do and so we've been so delighted with the change over to the centre pivot system with the Isuzu engines, they just work away all day and it's not something we have to think about or worry about," Ivi explained.

And Paul agrees, "The Isuzu engines built to meet the harsh Australian conditions are outstanding, and you get so much support from the team, which is brilliant."

## Engine Assemblies

T&L Irrigation Repower Units

<b>3CB1CZP01PU02</b>	PU 18.7KW/25HP TL Repower	<b>\$10,419.60</b>

## ISUZU

# Genuine Batteries

## The Isuzu Battery Difference

Isuzu's range of sealed maintenance free batteries are designed and manufactured to the highest quality standards, ensuring exceptional performance and reliability.

### 1 ROTARY PLATES

- Specialist advanced plate design provides longer service life and resistance to corrosion and material shedding.
- Lower internal resistance promoting higher CCA and improved vibration resistance.

### 2 ENHANCED PLATE PASTE

- Reduces water loss and improves charge acceptance for superior performance and cycle life.

### 3 SEPARATORS

- High Porosity Polyethylene Envelope (PE) separator improves puncture resistance and durability.
- Improves electrolyte dispersion for enhanced performance and power.

### 4 FLAME ARRESTOR

- The integrated flame arrestor in the central venting system protects the battery from explosion due to external ignition sources.

### 5 MUD RACK

- Mud rack container design improves plate support, vibration resistance and isolates paste deposits to prevent short circuits.

### 6 POLYPROPYLENE CASE

- Reinforced design provides durability to withstand shock and vibration.

### 7 CARRY HANDLE

- Ergonomic design provides a thicker grooved carry handle to improve comfort.
- Utilises fully constrained safety design with pivot pin moulded directly into the case.

### 8 STATE OF CHARGE INDICATOR

- For on the spot diagnosis of battery condition.

### 9 CAST ON STRAP

- Thicker cast on strap ensures durability and lower electrical resistance to promote longer life.

### 10 LABYRINTH LID TECHNOLOGY

- Provides spill proof protection up to 90°.
- Reduced water loss.

## S SERIES HIGHLIGHTS

### CISPR25 CLASS 5

No Radio Interference and best EMC Performance

### THERMO PLASTIC HOUSING

Light Weight, Corrosion and Chemical Resistant

### OVERHEAT PROTECTION

Protects the circuit board and housing of lamp from overheating

### INTEGRATED THERMAL MANAGEMENT

Less Degradation of LED = Long lasting performance

### COMPETITIVE PRICE

Best performance with affordable price and value for money

### IMPACT RESISTANT PC LENS

Precision alignment for maximum performance and prevents accidental damage

### DANGEROUS GOODS APPROVED

Can be used on fuel tankers

### MADE IN AUSTRIA

Designed and Manufactured in Europe

**Donaldson Blue® Air Filters with Ultra-Web® Fine Fiber Technology**

Ultra-Web® Advantages:

- Engineered to perform in extreme temperature and humidity conditions, unlike ordinary fine fibers
- Optimized fiber structure and fiber diameter so it's stronger and lasts longer in all environmental conditions
- High efficiency – longer engine life
- High capacity – holds more contaminant
- Identifiable by the blue media color
- Proven – used in diesel engine market for nearly two decades

92956027	Condensor - F series w/ 6SD1	\$854.15

# Full circle: Historic Restoration marks new chapter

As part of a range of activities coinciding with the release of Isuzu's all new model range, Isuzu Australia Limited (IAL) has paid tribute to its roots in undertaking a complete restoration of a heritage brand stalwart.

Unveiled for the first time and garnering plenty of attention at the recent Brisbane Truck Show alongside the 2025 NKR version of the same model, the battle-worn model year 1976, KS11 Elf 350 Tipper is enjoying a new lease on life thanks to the volunteer work of Isuzu staff in Melbourne.

## Back in the spotlight

Retaining its distinctive baby blue paint job, the Elf Tipper was the unofficial star of the brand's recent launch showcase in Brisbane; a proud moment for lead restorer and IAL's Senior Product Development Technician, Darren Pottage.

"It's been a long road to get this project completed and to see the old Elf Tipper up in lights again alongside its modern contemporary in Brisbane was just fantastic to see," Mr Pottage said.

Rarely sighted on Australian roads these days, the Elf 350 was remarkably sourced from its original owner, a Sydney-based concrete and formwork business, still operating under a different name.

## Bullet proof

Famous for their reliability and 'bullet proof' durability, the KS11 350 model has a notable history in the Australian market, where they gained significant popularity amongst a range of trade and construction applications throughout the 1970s and into the 80s.

## The process

Beginning in 2023, the restoration project saw a number of IAL staff participate during a range of stages, from stripping and disassembling the vehicle, through to sourcing and installing like-for-like parts and components as original.

"From the very beginning, the vision was to return this truck to its original condition, which involved removing the cab and factory tipper body, stripping-out the interior trim and essentially winding-up with a rolling chassis.

"Given the age of the truck, sourcing model correct componentry almost half a century later was always going to be a challenge, although with a little help of our parts department here in Melbourne, we were able to get our hands on everything required."

Isuzu Australia staff carried out the majority of work.

## Passion project

The next stage of the restoration involved some extensive panel work to both the cabin and the factory tipper body, as well as the refurbishment of the cabin interior. Even the original glass manufacturer was identified and secured to re-supply and re-seal the cabin.

"We engaged some brilliant local suppliers here in Melbourne's west that shared our passion for this project and really threw themselves into the work.

"From the interior trimmers to the panel beaters and painters, we couldn't have asked for a better group to collaborate with on this and the results really do speak for themselves," Mr Pottage remarked.

## Under lights again

The concluding rite of passage for the Elf 350 Tipper was a striking new paint job in the original colour palette, before reassembling the iconic model in readiness for its final destination: the largest truck show in the southern hemisphere.

"It's been a challenging, but also extremely rewarding process to be a part of, said Mr Pottage.

"This is a part of our heritage and as a companywide achievement, it's a piece of motoring history we can all look back on for years to come and say, 'that's us, that's Isuzu right there,'" he concluded.

The KS11 Elf 350 Tipper alongside the MY25 NKR at The Brisbane Truck Show

## Meritor® Input & Output Shaft Seals

Multiple-Lip Seal (MLS) to suit 145/160 Series Carriers.

A11205X2728	Input Shaft - Forward Carrier	\$128.70

\*Subject to Core Charge of \$1650 inc. GST, credited upon meeting terms & conditions of Meritor Core Management Process SOP #22-002

# Heritage Merch Range Captures Isuzu's Storied History

Isuzu Australia Limited (IAL) is paying homage to its storied international history by launching a merchandise range.

Following the introduction of an all-new model line-up last month, Isuzu Australia Limited (IAL) is paying homage to its storied international history by launching a merchandise range set to satisfy not only fans of Australia's leading truck brand but also those who embrace Japanese *sutairu* (style) and *bunka* (culture).

Made available exclusively to attendees of the recent Brisbane Truck Show before rolling out to the Isuzu Trucks dealer network, the heritage merchandise line includes a range of apparel, decals and key rings adorned with a range of traditional Isuzu designs scarcely seen in Australia until now.

Alongside a full range of contemporary garment styles, including vibrant colour pallet and hardwearing fabrics to ensure durability, the range includes headwear and accessories splashed with heritage logos from yesteryear.

## Sacred history

For the first time Isuzu has included a heritage line that encapsulates its journey from the very first simple geometric logo in 1949, which reflected the company's connection to the revered Ise region and surrounding area in central Japan.

Depicting the tagline, 'Fifty Bells,' the post-war logo was inspired by the Isuzu River and the Ise Grand Shrine - dedicated to the solar goddess Amaterasu Ōmikami and the grain goddess Toyouke-hime - reminiscent of Japan's Edo and Meiji periods.

The merch range also gives the nod to subsequent logo variations since, including its Australian arrival in the late 1960s, right through to today.

The heritage line includes a range of styles of hats, caps, t-shirts and stubby holders with a classic Japanese twist on style.

IAL National Parts Sales Manager and the brains behind the merch line-up, Joel Gledhill, said the Brisbane Truck Show was the perfect event to launch the unique range.

"For sure the trucks were the star attraction of the launch, but so many people took away a piece of Isuzu history via this new merchandise range, which was fantastic to see.

"We always wanted to have a bold new merch look that complemented our product well and we wanted to ensure Isuzu's unique heritage was represented appropriately and in a culturally safe way.

"We looked to embrace the storied history of the brand, whilst giving a nod to Japanese culture and fashion. Based on the feedback we've received; I think the result has really blown many people away.

"The great thing about this heritage look is that it simply looks 'cool.' Whether you're an Isuzu owner, a heavy vehicle enthusiast or just someone who likes fashion with meaning, you will want to get your hands on these items."

Stock was literally running off the shelves at the Brisbane Trucks Show, but it's not the final time it will be seen, with Isuzu Truck dealers now offering the same range at parts counters across the country while stock lasts.

"We had a range of dealer groups from across the country at the Brisbane event and they're all busy making plans on how they are going to display these one-off items," said Mr Gledhill.

"Just like our vehicles, the Isuzu merchandise range must always represent the brand in terms of quality.

"It has always been at an affordable price and this range is no different - no F1-styled pricing!

"I would simply say get down to your Isuzu Trucks dealer and get some of this great looking kit while it lasts and secure a unique piece of Isuzu history."

Isuzu merchandise is available through dealerships across the country.

The Heritage range was a huge hit at the Brisbane Truck Show

## ISUZU MERCHANDISE

# Heritage

Isuzu's all new merchandise collection is crafted specifically for dedicated Isuzu Truck customers. The Heritage collection pays homage to Isuzu's extensive history by offering nostalgic products adorned with iconic emblems that represent its legacy since 1916.
